TECHNOLOGIES

Ignite the Flame of Education

Data Intelligence & Analytics Program

Engage in Data Science & Analytics Mastery

Duration: 4 Months | Mode: Online | Level: Beginner to Advanced
Powered by CodeEmy!

 **REGISTER NOW**

Scope of **Data Science & Analytics**

20+ million
data-related jobs globally 2026

\$500+ billion
data analytics & AI market

2+ lakh
job openings in 2026

90%+ of
Enterprises

Here is all the **Career Fields** you can excel at

Data Scientist

Data Analyst

**Business Intelligence
(BI) Analyst**

**Machine Learning
Engineer**

Data Engineer

**AI & Analytics
Specialist**

**Predictive Analytics
Analyst**

Big Data Engineer

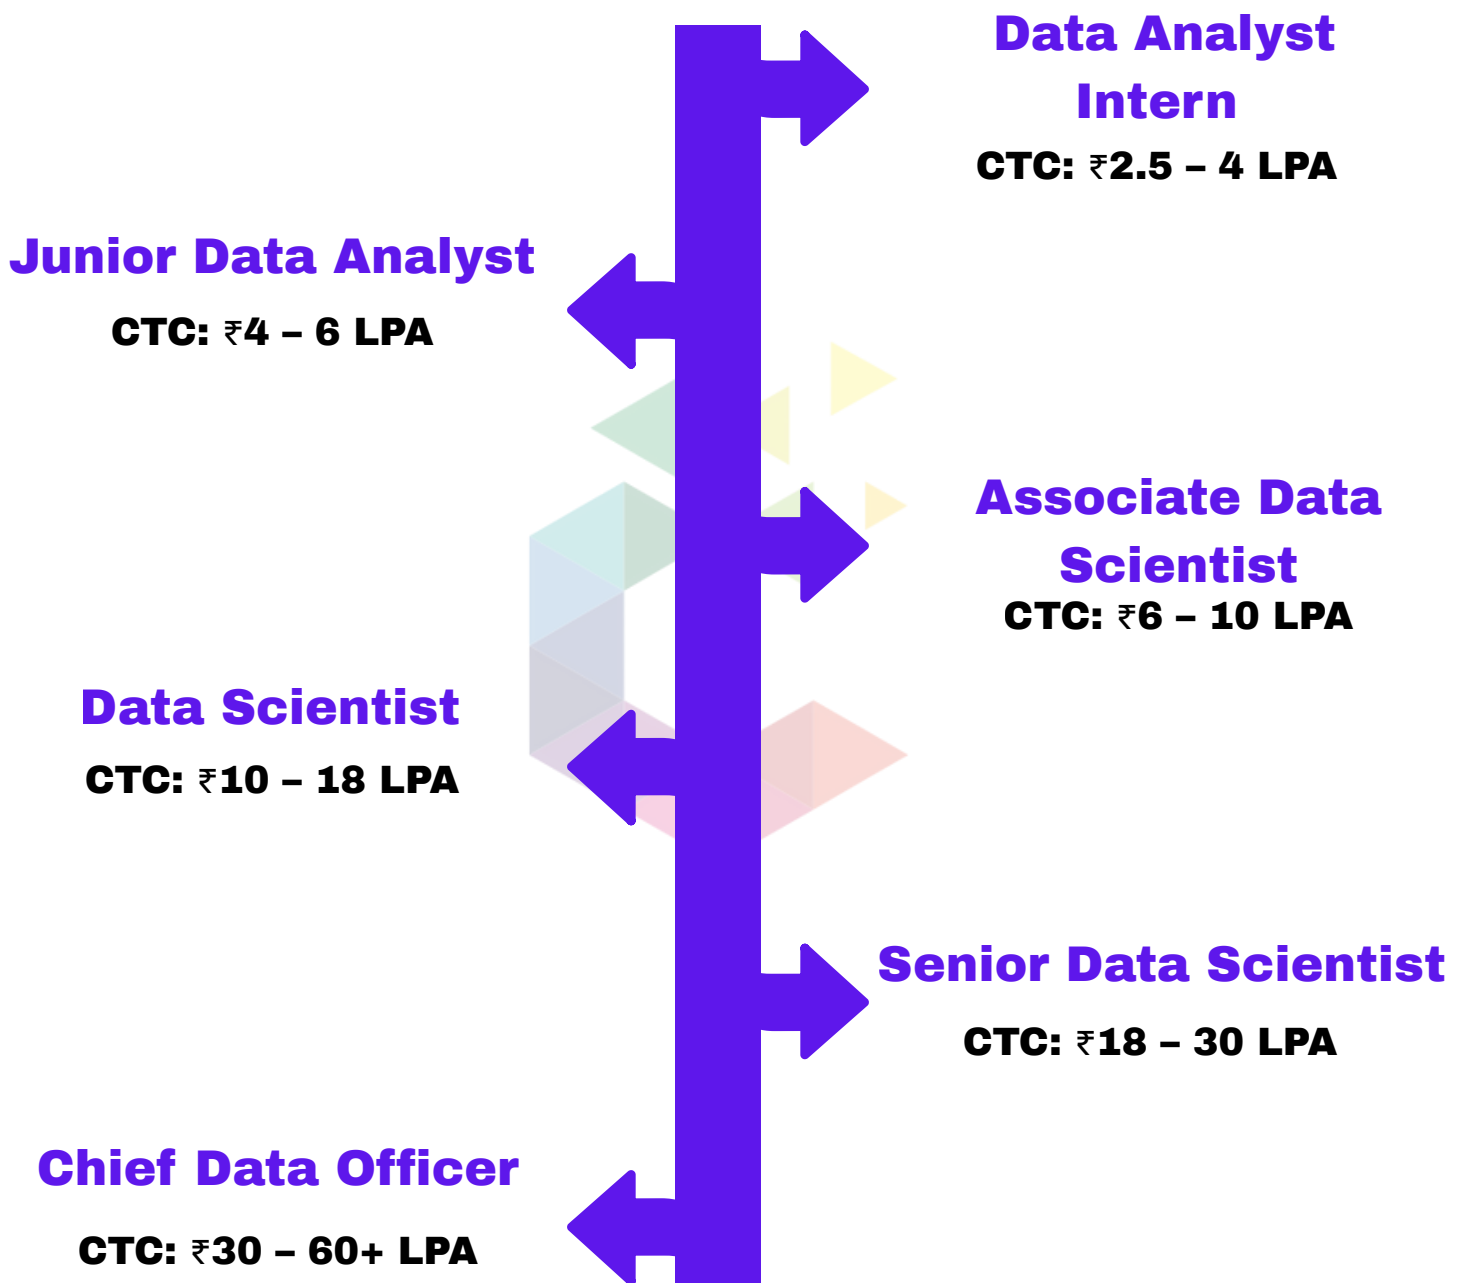

**Statistician /
Quantitative Analyst**

Analytics Consultant

UNIQUENESS

Week 1

- What is Data Science & Analytics
- Roles & responsibilities
- Data lifecycle & analytics workflow
- Industry use cases

Tools overview: Python, Excel, SQL, Tableau

Week 2

- Python basics for data
- NumPy & Pandas fundamentals
- Data loading & manipulation

Project: Load & inspect datasets

Week 3

- Handling missing values & duplicates
- Encoding categorical variables
- Feature scaling & normalization

Project: Clean a real-world dataset

Week 4

- Descriptive statistics
- Data visualization: Matplotlib & Seaborn
- Identify trends, patterns & outliers

Project: EDA report for a dataset

Week 5

- SQL basics, joins, aggregations
- Subqueries & filtering
- Data extraction for analysis

Project: Analyze a business dataset with SQL

Week 6

- Advanced Excel: Pivot tables, charts, conditional formatting
- KPI & metrics calculation
- Business dashboard basics

Project: Build an Excel analytics dashboard

Week 7

- Probability concepts
- Measures of central tendency & dispersion
- Correlation & hypothesis testing

Project: Statistical insights from datasets

Week 8

- Power BI & Tableau basics
- Data modeling & interactive dashboards
- Best practices in visualization

Project: Interactive dashboard in Power BI/Tableau

Week 9

- Supervised vs Unsupervised learning
- Regression & classification
- Model evaluation metrics

Project: Simple prediction model

Week 10

- Decision Trees & Random Forests
- Clustering (K-Means, Hierarchical)
- Dimensionality reduction (PCA)

Project: Customer segmentation / prediction

Week 11

- Introduction to Big Data & tools
- Handling large datasets
- Introduction to Spark or Hadoop (conceptual)
- Analytics case studies & storytelling

Week 12

Major Project Options:

- Sales Forecasting Model
- Customer Churn Prediction
- Business Intelligence Dashboard (Power BI/Tableau)
- Portfolio building, GitHub, and interview preparation

Hands - On Projects

Mini Projects (Beginner to Intermediate Level)

1. Sales Data Analysis

- **Skills Used:** Python (Pandas, NumPy), Excel
- **Goal:** Analyze a sales dataset to identify trends, peak sales periods, and product performance.

2. Customer Segmentation

- **Skills Used:** Python, K-Means Clustering, Matplotlib/Seaborn
- **Goal:** Segment customers based on purchasing behavior to target marketing campaigns.

3. Employee Performance Analysis

- **Skills Used:** SQL, Python, Excel
- **Goal:** Analyze employee data to find patterns in performance and attrition.

Major Projects (Advanced Level)

1. Customer Churn Prediction

- **Skills Used:** Python, Logistic Regression, Random Forest, Data Preprocessing
- **Goal:** Predict which customers are likely to leave a service based on historical behavior.

2. Sales Forecasting

- **Skills Used:** Python, Time Series Analysis, Pandas, Scikit-learn
- **Goal:** Build a model to forecast sales for the upcoming months.

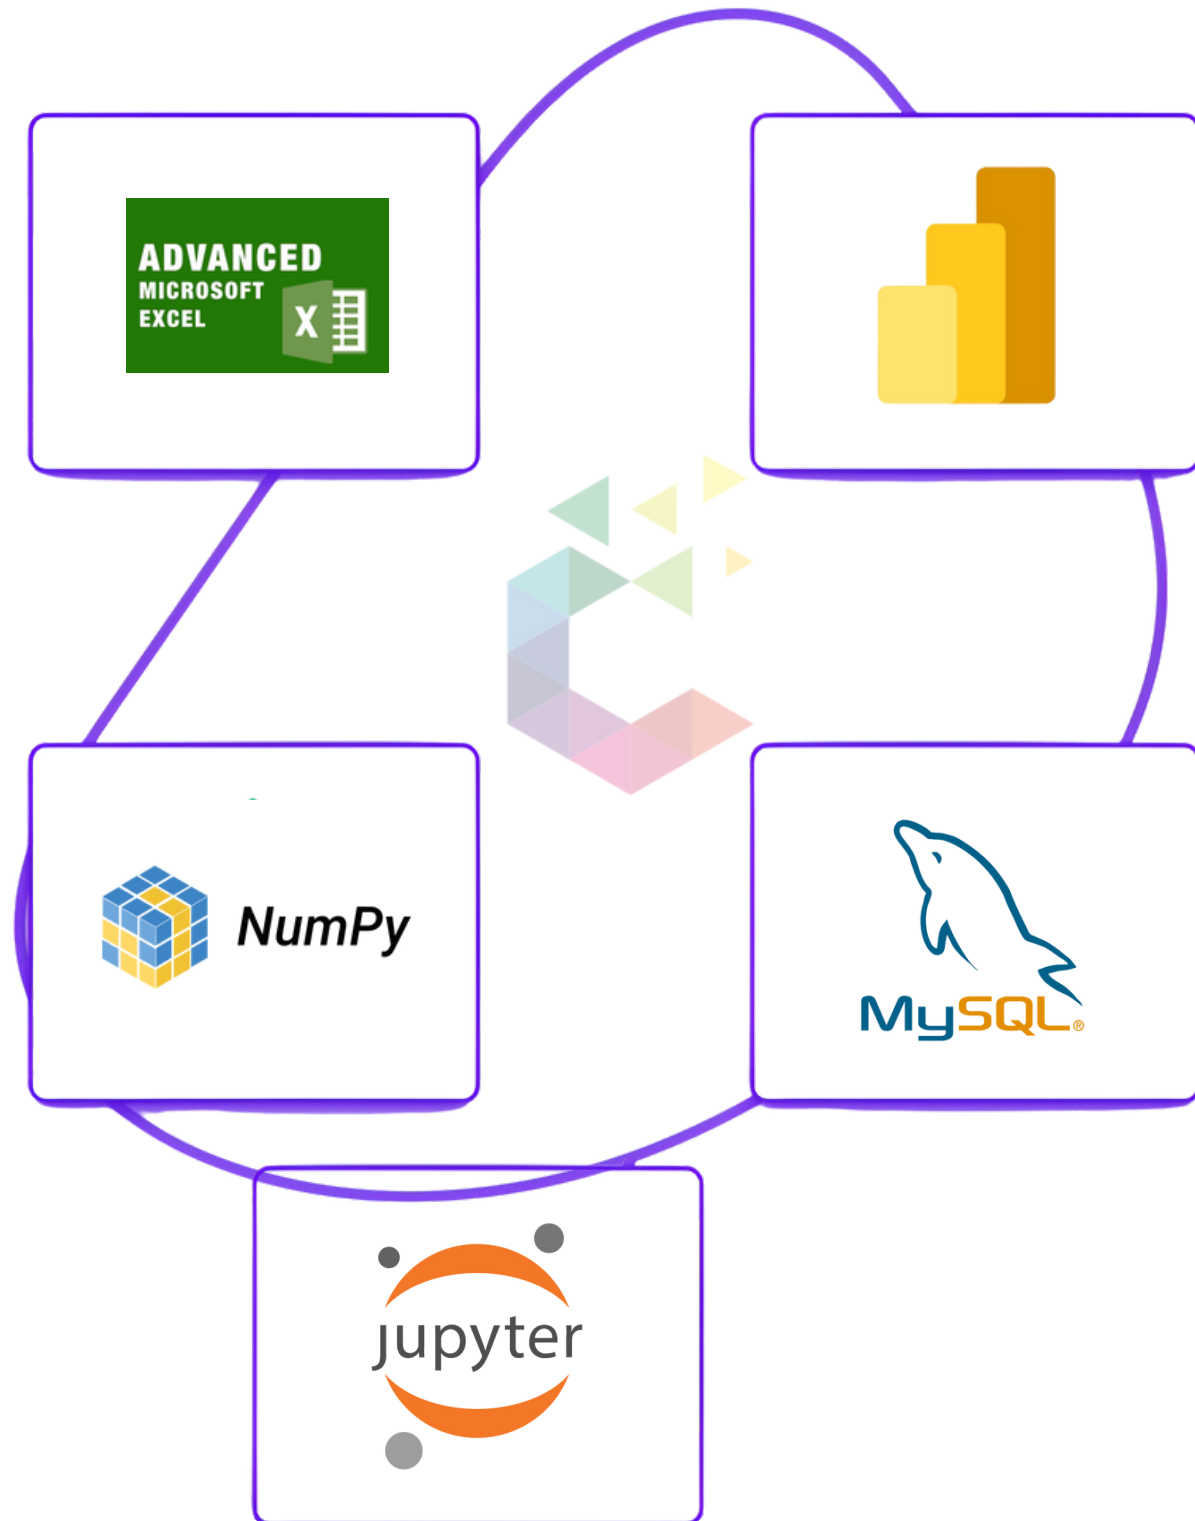

3. Business Intelligence Dashboard

- **Skills Used:** Power BI / Tableau, SQL, Data Visualization
- **Goal:** Create an interactive dashboard showing KPIs, trends, and insights for decision-making.
